

\$100 OIL?

CORPORATE PROFILE

Klean Industries ("KI") is an environmental solutions company headquartered in Vancouver, Canada. Klean Industries is committed to solving waste management problems large and small in an economically meaningful and environmentally responsible manner with a focus on two significant waste streams, petroleum based waste (specifically plastics and scrap tires) and organic waste.

KI provides clients with innovative, cost-effective, and environmentally-friendly solutions. We are a design engineering and construction firm that specializes in recycling, resource recovery, steam and power generation facilities.

Our services include the engineering, procurement, construction, start-up, and operator training for all our facilities. KI has registered professional engineers in all disciplines; therefore, we perform 100% of design engineering "in-house". We are committed to meet and exceed the expectations of our customers regardless of the size or project location.

KI provides high quality, responsive and value-added services to clients both in Canada and overseas. The firm's **unique blend of management, design and operational skills** helps clients to identify lasting solutions that meet the "triple bottom line" in today's business environment - financial, social and environmental responsibilities. KI is creating a unique convergence between waste recycling and renewable energy.
